28-day observation diary

Dublin City Council

Morning or weekend sound observations

Council or planning case reference _____

Observation point (for example, rear window) _____

Date of day one _____

Reference hours and time zone, if applicable _____

How to make an entry

Use local time and the calendar date. Use one row for each separate event. If it continues after midnight, include both dates. Mark times you had to estimate. Leave unobserved periods blank or write “not observed”.

Write what you actually heard, such as repeated hammering. Mark any time you had to estimate.

Keep the original sheets. For more than five entries on a day, copy its sheet and label the continuation. Ask your council if it needs its own form.

Local reference

Check the published permission and any approved changes for the location. Record any relevant reference hours exactly as written.

Dublin City’s usual noisy site hours are 07:00–18:00 Monday to Friday and 08:00–14:00 Saturday. No noisy work is normally allowed on Sundays or public holidays. Check the site permission and any approved variation.

What belongs in the diary

Use a location label such as “rear window”. Write what you noticed personally. Omit third-party names, allegations and guesses about the source.

Days 01–04
